

.commercercs Extension User Guide

One Step Checkout for Germany

(April, 2015)

 **commercercs**

Scope of Extension

There are many One Step Checkout solutions for Magento. However, none of them – whether paid or for free – meets the German requirements like e. g. for the “Place order” button.

For a number of years, we have adjusted One Step Checkout solutions just to meet the German requirements. Now we have implemented these requirements in **the first One Step Checkout for German Magento shops.**

No more subsequent programming – just install our One Step Checkout extension, make a few individually desired adjustments – and you’re done.

Using the .commercercs One Step Checkout for Magento you can look forward to many smart solutions. Feel free to activate or deactivate them in the backend:

- ✓ Release tool for forwarding customer’s email addresses or telephone numbers to the shipping provider. This feature optimizes your workflow and smoothly performs with the order processing solution “Barcode Shipping” (www.barcodeshipping.de) by YBM Germany.
- ✓ Pictorial and/or textual representation of products in the checkout incl. multiple attribute administration
- ✓ Gift messages
- ✓ Redeeming coupon codes
- ✓ Subscribing for newsletters
- ✓ Comment field for customer’s questions or notes
- ✓ Fulfilling legal requirements for „Place Order Button“
- ✓ Freely configurable addresses (incl. order preferences)

The .commercercs One Step Checkout extension for Magento reduces the order process in your Magento shop from 5 to 6 longsome steps to just one single process on one page – in real time and optimized for Germany.

Due to rapidly changing laws and regulations, **we cannot accept any liability for legal certainty!** For legal certainty please consult a suitable lawyer.

Scope of Extension

Here you can see a possible One Step Checkout in the front-end where order relevant information are logically preselected or can be typed in:

CHECKOUT

Please complete the fields below.

1. ADDRESS

Select a billing address from your address book or enter a new address.

Franz Heckenbauer, Sinsheimer Str. 4, Mün

Ship to this address

Ship to different address

2. SHIPPING

Standard delivery

DHL €4.95

3. PAYMENT

Internal credit

Cash on delivery - Phoenix

PayPal

Bank transfer

COUPON CODES

Enter your coupon code if you have one.

Subtotal			€178.50
Shipping & Handling (Standard delivery - DHL)			€4.95
Tax			€29.29
Grand Total			€183.45

[PLACE ORDER](#)

Installation

1. For security reasons create a backup of your web shop (database and files), don't try new extensions in live shops without having tested them.
2. Deactivate shop compilation (if activated). Go to admin panel System Tools Compilation.
3. Usually you can use the Magento Connect feature to install the extension. Just go to System Magento Connect Magento Connect Manager – Search for the tgz file and upload it.
4. In case you cannot use the above method, unzip the file (twice) and copy the folders to the root folder of your shop installation. You can delete the package.xml file.
5. Go back to admin panel and clear cache. Go to System Cache Management.
6. Log out and log in again.

If you have any trouble with the extension, you can disable it:

1. Go to `app/etc/modules/Commercercers_OneStepCheckout.xml` and change `<active>true</active>` to `<active>false</active>`
2. Afterwards, please contact us on info@commercercers.com describing the problem.

Configuration - General

Basically, the general settings in the configuration menu are self-explanatory. We still discuss some options here.

One Step Checkout

General	
Enabled	<input type="checkbox"/> Yes
Allow add a comment	<input type="checkbox"/> Yes
Allow to show coupon	<input type="checkbox"/> No
Allow to show gift message	<input type="checkbox"/> No
Default Country	Germany
Go to checkout page after add product to cart	<input type="checkbox"/> No
Locale Fields	<ul style="list-style-type: none">None chosenCountryPost code/Zip codeRegionCity
<small>▲ Shipping rates and payment will be updated when changing these fields.</small>	
Allow customer subscribe newsletter	<input type="checkbox"/> Yes
Check subscribe as default	<input type="checkbox"/> No
Auto detect the location	<input type="checkbox"/> No
Default Payment Method	

In the comment field the customer can specify ordering details or can express his or her wishes directly (for example "Please add your latest catalog to my package.")

Selecting „Yes“ the customer can leave a personal message in the checkout. It will then be added to the order package. ATTENTION: This feature will only work, if the Magento-unique gift message is also enabled (System → Configuration → Sales / Gift Options).

Should this field be displayed and be enabled by default?

Location detection of customer's IP address yes/no.

■ Configuration – Billing Address

Here you can decide what information the customer must provide mandatory and what is voluntary when typing the billing address. However, first and last name are always mandatory and cannot be configured.

Billing Address Settings	
Show company field in address form	Optional
Show FAX field in address form	Not show
Show VAT Number in Billing Address	Not show
Country Field	Required
Post Code Field	Required
City Field	Required
Region Field	Not show
Street Field	Required
Telephone Field	Optional
Date of Birth	No
Gender	No
Tax Vat	No

Mandatory here: country, post/zip code, city, street

Voluntary here: Company name, telephone. Depending on your Magento configuration „telephone“ may be mandatory.

Not displayed: Fax, VAT number, tax VAT (Magento provides two different VAT fields. Choose the suitable field according to your Magento configuration), region, date of birth, gender

■ Configuration – Billing Address Order

This is the arrangement setup for billing address lines.

Billing Sort Fields

Set the same position number if two fields are on the same line (ignore if field is disabled). First/Last name and Email automatically on first line.

Company Order	<input type="text" value="1"/>	[STORE VIEW]
Fax Order	<input type="text"/>	[STORE VIEW]
VAT Number Order	<input type="text"/>	[STORE VIEW]
Country Order	<input type="text" value="4"/>	[STORE VIEW]
Post Code Order	<input type="text" value="3"/>	[STORE VIEW]
City Order	<input type="text" value="3"/>	[STORE VIEW]
Region Order	<input type="text" value="4"/>	[STORE VIEW]
Street Order	<input type="text" value="2"/>	[STORE VIEW]
Telephone Order	<input type="text"/>	[STORE VIEW]
Date of Birth Order	<input type="text"/>	[STORE VIEW]
Gender Order	<input type="text"/>	[STORE VIEW]
Tax Vat Order	<input type="text"/>	[STORE VIEW]

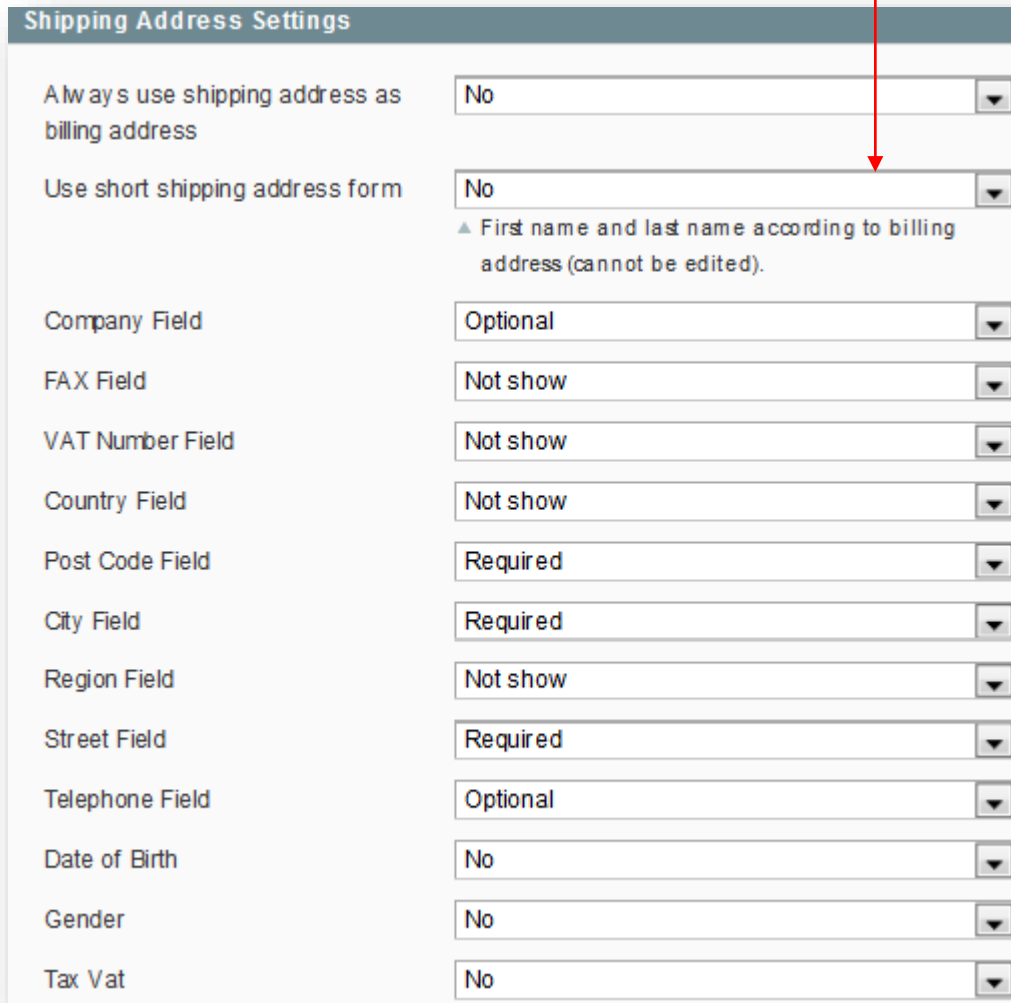

Arrangement according to the screenshot above:

First name last name
Sample Company
Sample Address No. 4
12345 Sample City
Sample region, sample country

■ Configuration – Shipping Address

Define what kind of information the customer must provide mandatory and what is voluntary when typing the shipping address. You can also define whether customers are allowed to specify a differing shipping address. It is also possible to limit the differing shipping address. First and last name cannot be changed, they are similar to the billing address specifications. This might be applicable in case of payments upon receipt of invoice.

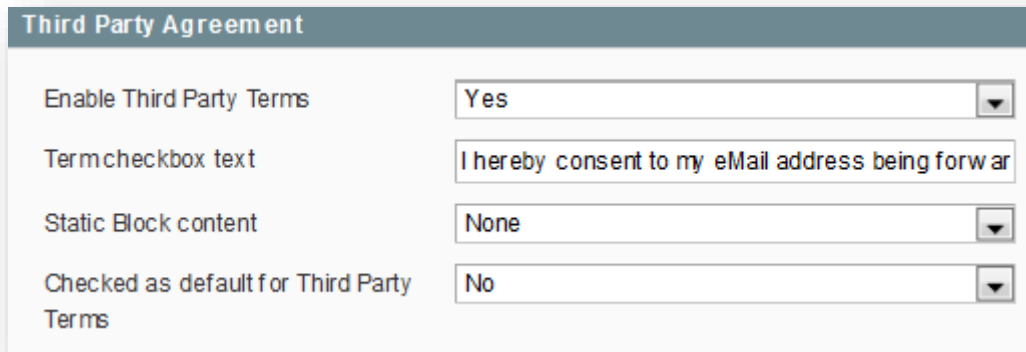

Shipping Address Settings	
Always use shipping address as billing address	No
Use short shipping address form	No ▲ First name and last name according to billing address (cannot be edited).
Company Field	Optional
FAX Field	Not show
VAT Number Field	Not show
Country Field	Not show
Post Code Field	Required
City Field	Required
Region Field	Not show
Street Field	Required
Telephone Field	Optional
Date of Birth	No
Gender	No
Tax Vat	No

According to the billing address settings you can choose optional fields, mandatory fields or fields that should not be displayed. The same applies to the arrangement setup afterwards.

■ Configuration – Data Protection Shipping Provider

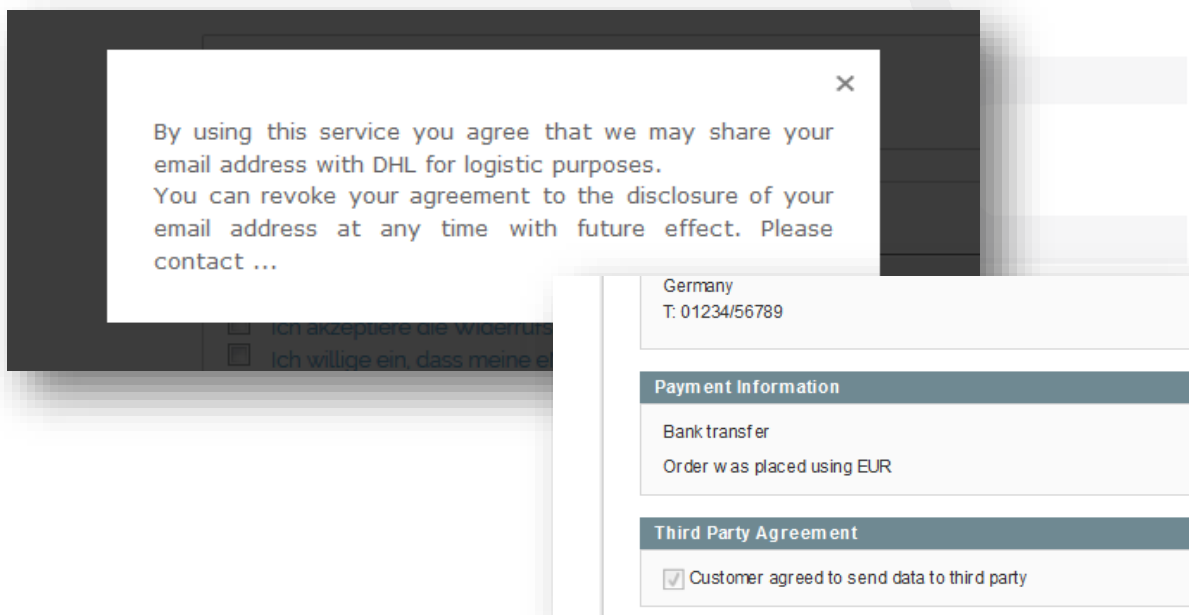

The automatic forwarding of customer's contact data to shipping providers is common practice in order to send delivery notifications to the customer.

According to the German data protection regulations shop operators may only forward contact information (e. g. email address) to shipping services after prior consent of the customer. To meet this requirement simply use a checkbox with a text that you define:

Third Party Agreement	
Enable Third Party Terms	Yes
Termcheckbox text	I hereby consent to my eMail address being forward
Static Block content	None
Checked as default for Third Party Terms	No

The checkbox text is clickable. It can be combined with a Static Block where you can inform your customer about data forwarding and revocation rights. Your text will be displayed as a pop-up window on the checkout page.

By using this service you agree that we may share your email address with DHL for logistic purposes. You can revoke your agreement to the disclosure of your email address at any time with future effect. Please contact ...

Germany
T: 01234/56789

Payment Information

Bank transfer
Order was placed using EUR

Third Party Agreement

Customer agreed to send data to third party

Configuration – Order Review

This is for several adjustments in the order review section.

Shopping Cart Items (in order review)

Cart editable	No
Show link "Go to cart"	Yes
Show item image	Yes
Item image width	80
Item image height	80
Static block before review	None Footer Links Company Cookie restriction notice Altersverifikation OSC_COD block OSC Third Party Agreement
Product attributes displayed in cart	Active From Active To Custom Lay out Update Description Image Gallery Allow Gift Message Group Price Base Image Enable Recurring Profile Manufacturer

Do you want the customer to be able to modify the cart within the order review?

Do you want the product image to be visible? If so, in which dimensions should it be displayed?

Feel free to integrate another Static Block here, e.g. including information about revocation rights, vacation or public holidays.

Which product attributes do you want to be displayed in the order review? (e. g. name, manufacturer, etc.). You are allowed to choose multiple attributes. According to the button regulations you need to display item relevant information in the order review. Feel free to decide what kind of information you would like to be displayed.

Configuration – Content Checkout Page

Give names to certain sections or create texts here.

Page title	Checkout
Page description	Please complete the fields below.
Display Static Block at the top	None Footer Links Company Cookie restriction notice Altersverifikation OSC_COD block OSC Datenw eitergabe
Display Static Block at the bottom	None Footer Links Company Cookie restriction notice Altersverifikation OSC_COD block OSC Datenw eitergabe
Billing header	{\$position}. A ddress
Shipping address header	Shipping address
Shipping method header	{\$position}. Shipping
Payment method header	{\$position}. Pay ment
Terms box header	{\$position}. Terms and conditions
Review order header	{\$position}. Order review

Feel free to integrate another Static Block here, e.g. including information about the checkout process.

It is possible to setup another Static Block at the bottom of the checkout page.

This is to assign names for the main categories in the checkout. In case you would like to have dynamic numbering, please use { $\$position$ }. If there is no need for including a shipping method (e. g. applicable for download items or virtual items), the numerical order will still work properly.

(cannot be used in case of a differing shipping address).

■ Configuration – Layout & Updates

Here you can adjust the layout of the checkout and define update processes in the background.

Manage Layout Checkout Page	
Layout	<input type="text" value="2 Columns"/>

Checkout Process Customization	
Loading shipping methods when updating payment methods	<input type="text" value="No"/>
Loading payment when updating shipping method	<input type="text" value="No"/>

In how many columns do you want the checkout page to be divided? (2 by default)

Do you have shipping methods depending on payment methods (or vice versa)? This is to define if there is an update after having picked a method.

commercercs.com

■ Configuration – Speed Optimizer / Compatibility

In order to optimize the performance and to accelerate the already fast process of the One Step Checkout, the .commercercers provide the opportunity to disable the RSS Observer and the visitor log.

You can apply further fine settings in “Compatibility“ (for advanced users only).

Speed Optimizer

Takes effect in this One Step Checkout, only (not in the default Magento checkout page).

Disable Rss Obserser

▲ If you choose "Yes", we will disable customer order feed and low stock feed. It will significantly increase the speed of your checkout process

Disable Visitor Log

▲ If you choose "Yes", we will disable the visitor log feature during the customer's checkout. It will significantly increase the speed of your checkout process

Compatibility (Advanced)

Load Gumby css framew ork

▲ You must load gumby css for responsive template. If you loaded it before, you can disable it. We recommend to enable it.

Load JQuery

▲ You must load JQuery. If you loaded it before, you can disable it. We recommend enable it.

Load JQuery UI

▲ You must load JQuery UI. If you loaded it before, you can disable it. We recommend to enable it.
